Proposed New Playground for Clyde

A new playground is being proposed for Clyde. A site in the new Sunderland Estate reserve on Fache Street has already been identified by the previous community board.

The Vincent Community Board is now seeking community feedback on the type of playground the community wants to have installed.

Depending on the age group that is targeted, there is a wide range of stand alone playground equipment available such as slides, swings, seesaws, climbing structures, and rocking animals. Examples and estimated costs of equipment available can be found in the proposal currently being circulated by the Board.

Feedback is required by Monday 17 December 2007. Copies of the proposal can be obtained from the Council offices or at the Clyde Four Square.
