Clyde Community Plan Working Group to Give an Update

This Saturday the Clyde Working Group will give a presentation on progress to date on the Clyde Community Plan.

Projects that have been worked on include; trying to get an underpass to link the end of the Rail Trail to Clyde, developing a heritage walkway in Clyde, planning for a new playground and lowering the speed limit into Clyde. Many different groups have already played a part in progressing these various projects.

The Plan identified a range of actions that needed to be achieved and each of these actions was prioritised. To date the group has been addressing those issues that were given highest priority.

All are welcome to come along to the Clyde Bowling Club this Saturday 24 November at 10:00 am.
