

Wally Sanford

I'm excited to take on a second term on the Cromwell Community Board at such a pivotal time for our town and the surrounding valley. We're in a period of sustained growth and we're having to balance the opportunities and challenges that come with such change. There's a lot to get right and we have the Board to do it.

I've seen Pisa Moorings over double in size in the 10 years I've lived there while raising two boys with my wife. As a surveyor I've been a part of the extensive growth in our town and have a good understanding of the infrastructure needed to sustain such growth into the future. I'm also very conscious of the demand on our social and cultural infrastructure so I'm thrilled about the opening of our new community venue and am keen to get our town centre development set on the right path for growth so our local economy can prosper.

Our Board members live, work and play in Cromwell and it's surrounding areas. We understand the big stuff and we care about the little things too. Please get in touch if you think there is anything the Cromwell Community Board or Council can either fix, plan for or perhaps just explain a complex issue in real terms. We're here to help.
