

Central Otago Labour Survey – Horticulture and Viticulture

KEY FACTS

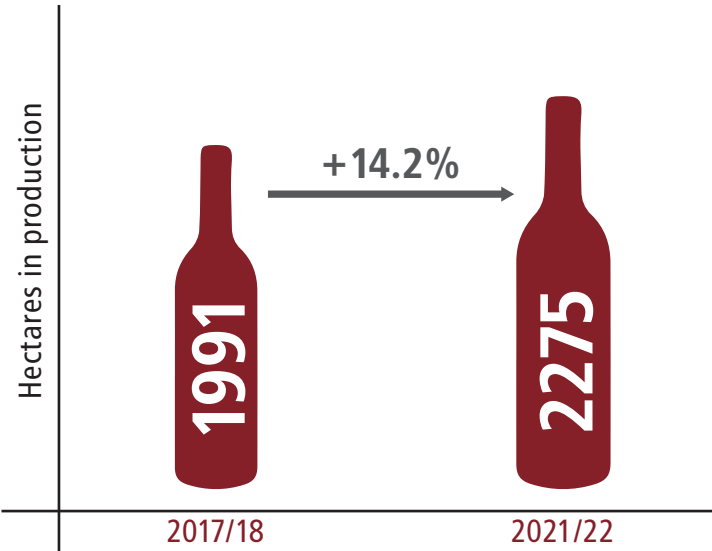

Planting Increase

There are plans for 465 hectares of new cherry plantings in the next 4 to 5 years, with feasibility studies underway to develop a further 495 hectares of cherries.

Grape Production

There will be new grape plantings of 284 hectares. There is also the possibility of a further 100 hectares of development.

Growth Location

Growth in the next 5 years will come predominantly from the horticulture sector in the Cromwell region.

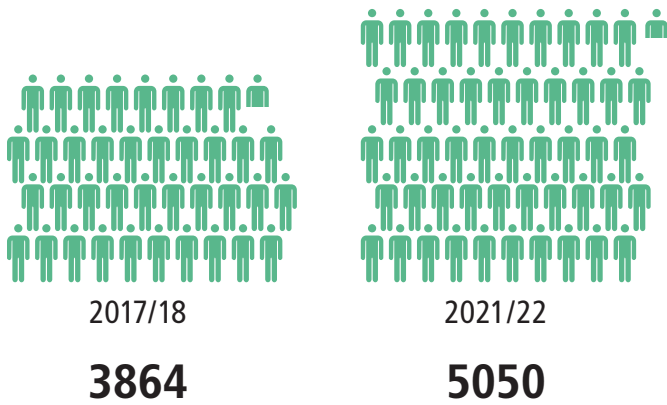

Cromwell	2017/18 planted hectares = 597 2021/22 planned increase = plus 69%
Alexandra	2017/18 planted hectares = 587 2021/22 planned hectares = plus 22%
Teviot Valley	2017/18 planted hectares = 645 2021/22 planned hectares = plus 3%

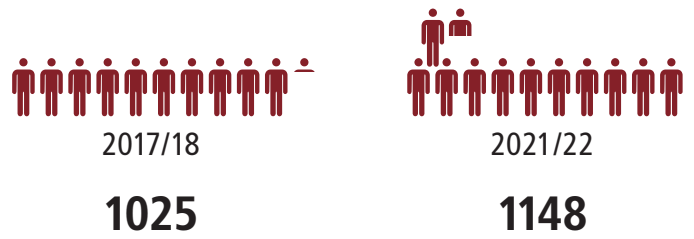

Working

The peak horticulture harvest period will see an increase in labour demand of 1186 workers over the next five years, with predicted viticulture increases for the same period of 123 workers at harvest.

Grapes

Key: 1 person = 100 workers

Accommodation

There will be an increase in demand for accommodation of 6198 beds to cater for peak harvest demand by 2021/22 for both sectors. While there is a predicted increase in bed and camping capacity supply of 1615, there is still a forecast shortfall of 2298 beds.
