

## Lake Dunstan Trail

Typical Signage

Date: 17 Sept 2018

Figure 1: Entry & wayfinding signage, Roxburgh Gorge Trail

The above signs are typical of the size and style of signage expected for the Lake Dunstan Trail. These signs advise the public of general expectations of trail behaviour and various exclusions that may apply. The signs will be developed in consultation with the land manager(s). The Trail Developer does not hold management rights to the land where the trail is located thus any restrictions placed on use of the trail will be at the landowner's discretion.

Similar signs will be installed at the following locations:

- Bannockburn Inlet entry – 2.1km
- Cornish Point Road (2 sites) – 5.6km & 7.3km (end of legal road)
- Clyde Rowing Club entry - 31.4km

Figure 2: Warning Advisory sign, Roxburgh Gorge Trail

This sign warns users that they accept use of the trail at their own risk. These signs are installed at the very beginning and end of the trail such that trail users can make a decision and have the ability to turn around before getting a significant distance along the trail route.

The above sign will be installed at the following locations:

- Bannockburn Inlet entry – 2.2km
- Cornish Point Road Entry (2 sites) – 5.6km & 7.35km
- Clyde Rowing Club entry – 31.3km

Figure 3: Rock fall hazard, No stopping 600m

The above signs are installed on the Roxburgh Gorge Trail near The Narrows, 5km south of Alexandra. These signs advise of the potential for rock fall and that no stopping is recommended to minimise exposure to the hazard.

The above signs will be installed at the following locations:

- 9.8km and 10.1km
- 19.1km and 20km

Additional locations may be identified during the construction and post construction geotechnical review being undertaken by Geoconsulting.

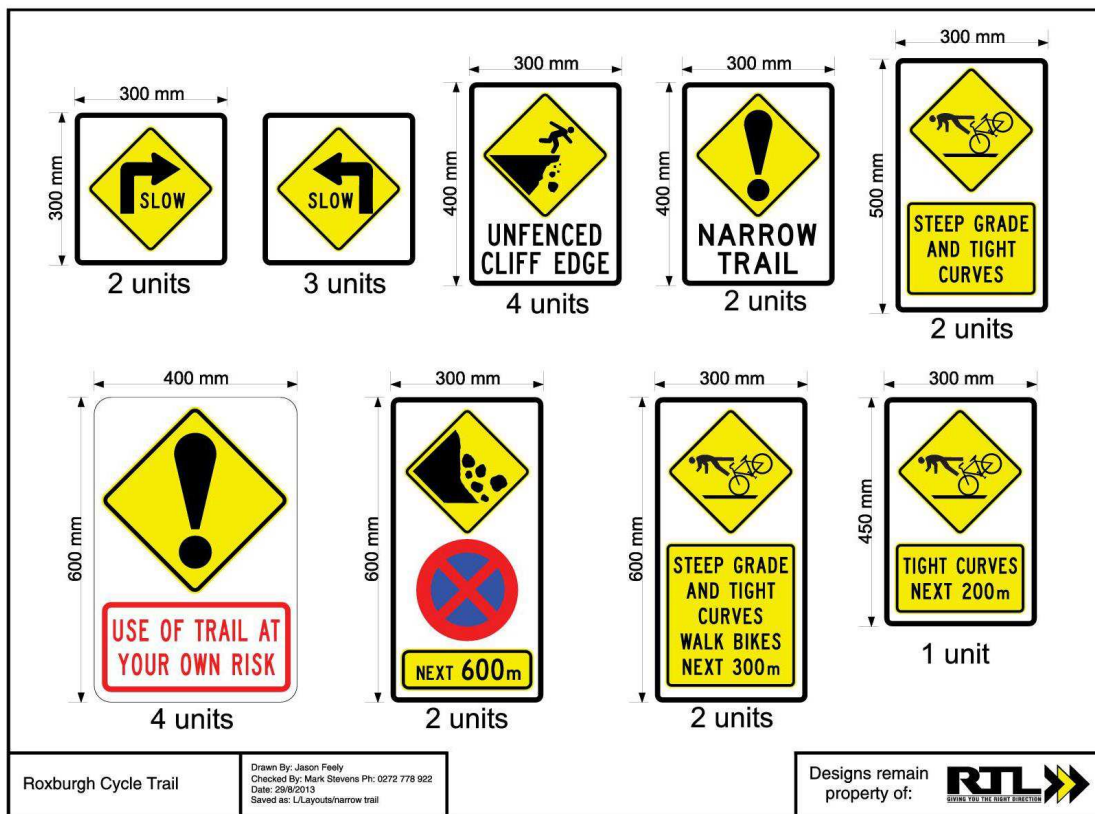

Figure 4: Roxburgh Gorge Warning Signs

The above figure details all the warning signs used on the Roxburgh Gorge trail to provide an example of the type and nature of warning signage. It is likely that some of the above signs will be required for the Lake Dunstan Trail. These will be identified during the construction process and installed prior to the trail being opened to the public.

Figure 5: Private Property

Similar signage to the above being 300mm x 200mm will be placed on all adjoining gates and accessways to clearly delineate private land.

Figure 6: Distance markers

The above 200mm x 200mm signs will be installed on timber posts at 1km intervals along the trail to advise users of the distance travelled and distance to go.
